

Direct Source

wireless solutions

- | | | |
|-------------------------------|--------------------------------|--------------------------------|
| ■ wireless LAN infrastructure | ■ site survey | ■ portable data terminals |
| ■ network planning | ■ voice-over IP | ■ batch-to-wireless conversion |
| ■ technology migration | ■ custom wireless applications | ■ optimization |
| ■ security and PCI compliance | ■ intrusion detection | ■ quality design and audits |

Portable secure data solutions for networking options, transaction assistance and more, all tailored to your specific environment.

FINDING THE RIGHT FIT FOR WIRELESS: EVERYWHERE

What was once a supply chain technology is now a powerful productivity tool throughout a location, streamlining operations, improving accuracy, enhancing customer service, saving time and expense.

For more than 20 years, Direct Source has utilized its real world experience with wireless technology. Direct Source works with manufacturers, integrates software and deploys hardware to match your current system with the best solution. We are product-neutral and trained in the trenches to know the promises and pitfalls of wireless. We can design and install a wireless approach that performs seamlessly and reliably, future-proofed to maximize your investment.

ACHIEVING ROI THE RIGHT WAY: RAPIDLY

Maximize return on investment by applying additional productivity tools that reflect the newest advancements in wireless technology—like voice-over-IP (VOIP). Direct Source applies its experience to find the latest, and best, wireless mix to suit your needs.

MOVING AT THE RIGHT PACE: FASTER

These days many businesses are leveraging wireless technology to improve the customer experience and learn more about their customers.

STANDING ON THE RIGHT SIDE: YOURS

Direct Source knows wireless. We help industry leaders design and implement wireless technology to become PCI-compliant, more competitive, more efficient and more customer-friendly. We make it our business to understand the breadth of wireless technology, and with our experience we can recommend a custom-fit solution that works best for you and your nationwide locations. That's the Direct Source difference: We specifically focus on what will fulfill your critical needs.

FILLING THE RIGHT TECHNOLOGY GAP: SERVICE

Because we design, integrate, stage, deploy and install the systems we recommend, we have expertise inside and outside your location's four walls. Our approach is practical, proven and customer-centric.

- System consultation identifies the ideal solution.
- Project planning and management mitigates risk and delivers results.
- Hardware procurement and application development are hassle-free.
- Staging and on-site installations support with rapid, accurate completion.
- Deployments and installation are performed throughout North America.
- Vendor independent, with strong partnerships with industry leaders such as: Cisco, Trapeze, Motorola, Aruba and many others.
- With our cable installation and network services abilities, we provide end-to-end support that delivers rapid, efficient and cost-effective results.

Direct Source

the direct source difference

As an independent representative of technology products and a full-service provider, Direct Source is a valuable resource for any community.

■ UNBIASED EXPERTISE

permits an open-systems approach integrating individual products to produce the ideal fit.

■ TECHNICAL INTELLIGENCE

drawn from more than a decade of technology experience, helps your business reach ahead without leaving behind current infrastructure investments.

■ FUTURE-PROOFING

delivered in long-term functionality along with built-in capability for future upgrades, modification and migration.

■ ALIGNED

to specifically reflect each client's persona through business, process, philosophy and expectations.
