distribution centers and warehouses ❖

Everything under
one roof.

FINDING THE RIGHT FIT FOR SUPPLY CHAIN TECHNOLOGY: EVERYWHERE

Achieving efficient distribution center and warehouse operations depends upon the enabling technologies that support effective supply chain management. Direct Source provides the best in integration services, along with impartial expertise for enabling technologies, such as network and communication devices, data capture and peripherals to support all levels of your supply chain. We consult on, and manage projects that synchronize your distribution center and warehouse process and inventory control; manage cycle count, order management, shipping and receiving; and provide price verification and asset tracking.

DETERMINING THE IDEAL SOLUTION: CUSTOMIZED FOR YOU

Direct Source provides technologies that help you to manage operations data more efficiently, lowering costs and enhancing accuracy in your supply chain. These technologies and services include:

- Wireless
- Portable data terminals
- Network infrastructure
- Voice and data design and cabling
- Staging and configuration
- Project management

In addition, Direct Source has partnered with auto-ID manufacturers to offer the latest in scanner technologies, with features that include:

- Adaptable software keyboard configurable to more than 25 layouts to scale to an operations' needs
- Omni-directional reading with standard, high density and wide angle optics
- Expanded radio range and multidirectional reading for superior performance
- Display and keypad options to enable two-way data communication

- The latest in Bluetooth® wireless technology
- RFID and voice recognition technology
- Handheld bar code scanner for quick data entry and location confirmations
- Vehicle mount solutions with superior shock absorption and resistance to environmental factors like dust and temperature

ACHIEVING ROI THE RIGHT WAY: RAPIDLY

Our distribution center and warehouse products and services offer an increased return on investment through decreasing the time it takes to manage and update supply chain data and maximizing operational efficiency.

PROVIDING SOLUTIONS AIMED IN THE RIGHT DIRECTION: AHEAD

Direct Source and its partners know distribution and warehouse center technologies. We help businesses nationwide implement supply chain solutions that not only address current systems, but easily integrate with future plans.

FILLING THE RIGHT TECHNOLOGY GAP: SERVICE

Because we design, integrate, stage, deploy and install the systems we recommend, we have expertise within the four walls of the distribution and warehouse center. Our approach is practical, proven and customer-centric.

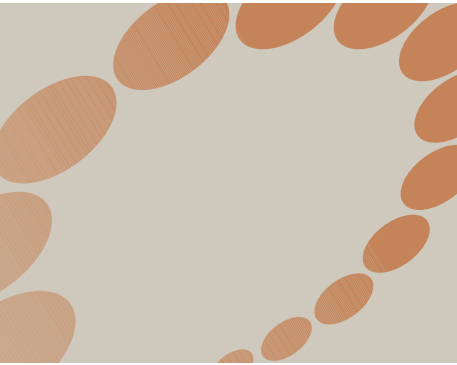

- System consultation and RCDDs identify and design the ideal technical fit
- Project planning and management mitigates risk and delivers results
- Hardware procurement is hassle-free
- Staging and on-site installations support with rapid, accurate completion
- Deployment and installation are performed nationwide
- End-to-end support delivers rapid, efficient and cost-effective results

Direct Source
what's in store.

the direct source difference

As an independent representative of technology products and a full-service provider, Direct Source is a valuable resource for the distribution center and warehouse community.

■ UNBIASED EXPERTISE

permits an open-systems approach integrating individual products to produce the ideal fit

■ TECHNICAL INTELLIGENCE

drawn from more than a decade of technology experience helps your supply chain deliver while optimizing existing infrastructure investments

■ FUTURE PROOFING

delivers long-term functionality along with built-in capability for future upgrades, modifications and migrations

■ ALIGNED

to specifically reflect each client's persona through business, process, philosophy and expectations
